Want to take a peek at Ubisoft's next console strategy game? Gaze upon R.U.S.E, the new "one-of-a-kind" RTS property that the publisher recently announced. Though we were first treated to a lofty bit of CG footage, now we have an actual in-game walkthrough detailing the game's "deception" mechanic. Looks impressive. Coming off of EndWar and Halo Wars, one wonders what lessons Ubisoft have taken to heart with the whole RTS-to-console approach. Hopefully a closed beta test is in the works. R.U.S.E will be out later this year.
